

Green Competences for Green Jobs

A greening economy requires a workforce with adequate green skills. TVET plays an important role in the transformation process towards sustainable development. The participants will understand the concepts of green economy, green skills/competences and green jobs. They will learn how to identify green competences and to develop a training module on cross-occupational green basic skills.

- **Content, elements, format and duration can be customised to the respective needs.**

This topic includes the following courses:

Sample Course 1: Green Economy, Green Jobs and Green Competences

Sample Course 2: Development of Green Competences

Sample Course 3: Training Module on Green Basic Competences

Learning outcomes

On completion of the training, participants

- are able to describe policies, strategies and concepts on green economy, green skills and green jobs
- able to explain approaches and examples on implementing green competences in the TVET system
- can apply selected teaching methods within an action-oriented approach
- have designed a training module on basic green competences
