TVET Academy

Digital Transformation of TVET Institutions

Sample Course: Managing Digital Teaching and Learning

Digitalisation of education requires organisational, personnel and teaching development as well as technical measures. Therefore, it poses challenges not only to teaching staff but also to TVET management.
This course provides TVET management personnel with an overview on digitising education and how to guide the implementation.

Content, elements, format and duration can be customised to the respective needs

Learning outcomes
On completion of the training, participants are able to
- describe aspects of digitalisation in the context of teaching and learning in TVET, its opportunities and limitations
- explain resulting changes in teaching and learning
- deduce qualification requirements for TVET teaching staff
- derive digitalisation options suitable and affordable for their institutions

Contents
- Definition and trends of "digitalisation of education"
- Role of school management in the transformation process
- Hardware, software and tools for digital teaching and learning
- Methods and concepts of digital teaching and learning
- Resulting requirements for teaching staff
- Financial aspects of digital teaching and learning

Formats
Face-to-face or hybrid.

The implementation of the training considers interactive methods and encourages participants to transfer the gained knowledge to their working context.

Language
- English
- Upon request: other languages with interpreters

Target groups
- TVET management staff
- Decision makers from relevant ministries, authorities, and institutions

Duration
- 4 days

Additional option
- Online coaching

Certificate
The participants will receive a certificate of participation after successful completion of the course.
