

Subject Didactics in Various Occupational Fields

International Competence Development in Technical and Vocational Education and Training (TVET)

Qualified teaching and training staff is a key resource to reach a high standard of competence development for young professionals. Therefore, the TVET Academy offers a range of practical trainings in selected technical fields with the aim to support multipliers in developing practical competences for teaching and training in a respective occupational field.

Content, elements, format and duration can be customised to the respective needs.

This topic includes the following courses:

- Sample Course 1: Introduction into Subject Didactics for TVET in Metal and Electrical Occupations
- Sample Course 2: Subject Didactics for Mechatronics
- Sample Course 3: Subject Didactics for Electrics
- Sample Course 4: Project Method - Practical Training for Carpentry Teachers and Instructors
